OXYDATIF  
SOLUTIONS**

## Attestation

In my position as Doctor of Chiropractic, Director of the company SOS Stress Oxydatif Solutions based in 2300 La Chaux-de-Fonds (Switzerland), I hereby certify the use of Advanced Water S-100 from Adwatis SA as an alkaline food supplement to be diluted for a multitude of consumers and this regularly for more than 3 years. In all cases the dilution does not exceed 10% as recommended by Adwatis SA.

The observed effects of diluted Advanced Water S-100 are in direct line with those found in the scientific literature on alkaline waters, namely a deacidifying action of the body which helps to maintain the acid-base balance through essential mineral salts and an alkaline pH, whose reducing effect also acts as an antioxidant.

Unquestionable improvements in the state of health of people suffering from various pathologies have been observed after consumption of Adwatis Advanced Water S-100. Moreover, measurements of the level of oxidative stress showed redox values that balanced out after absorption of this food supplement at concentrations of 5% and 10%, without any undesirable side effects.

As a health professional and specialist in the field of oxidative stress, I can only recommend the use of this water as a food supplement to be diluted in view of its beneficial and positive properties on the cardiovascular, nervous, digestive, skin and immune systems among others.

La Chaux-de-Fonds, June 2020.
