

Environmentally friendly manufacturing process

From the purest mountain waters, water is ultra-filtered then re-mineralized and structured through an electrolytic process, generating high pH and unique molecular compositions mainly associated with silicon and phosphorus. This is the result of an innovative, patented electrolytic process as well as longstanding expertise and know-how. Having a pH of 12, it has about 100'000 times more negative ions than normal water (approx. pH 7). Advanced Water S-100 is extremely stable and keeps its ionic properties for years. It can be diluted with water or mixed under certain conditions with other ingredients while maintaining ionic properties.

The production process of Advanced Water S-100 is clean and without any negative impact on the environment. The by-product generated by the electrolytic process, i.e. the acidic water in the anode chamber, has a very low hydrochloric acid content which is neutralized and then eliminated, without any chlorine emanation. Our policy is to take into account not only the security of human life, but also the security of the environment.

Packaging size and content

Advanced Water S-100: Available in 18 liters bag-in-box (PE inner bag with plastic tap) Bag-in-box size: 300mm*300mm*290mm

Eur-pallet (EPAL) 800mm * 1200mm: 8 boxes/layer - max 4 layers: total 32 boxes equivalent to 576 liters.

Total height: approx. 1360mm. Total gross weight: approx. 625 kg. Total net weight: 578 kg.

Advanced Water S-100 Commodity Code: 2201.1000

Advanced Water Gel CC6: Available for sampling (1 liter)

Informations sur le conditionnement

Advanced Water S-100 : Disponible en bag-in-box (carton) de 18 litres. (Sache interne en PE avec robinet plastique)

Dimensions bag-in-box : 300mm*300mm*290mm

EUR-palette (EPAL) 800mm * 1200mm : 8 cartons/couche - max 4 couches, soit 32 cartons : total 576 litres.

Hauteur totale : env. 1360mm. Poids brut total : env. 624 kg. Poids net total : 578 kg.

Code douanier / position tarifaire de Advanced Water S-100 : 2201.1000

Advanced Water Gel CC6: Disponible pour échantillonnage (1 litre)

Verpackungsinformationen

Advanced Water S-100: Verfügbar in 18 Liter Bag-in-box. (Innenbeutel aus PE mit Kunststoff-Hahn)

Bag-in-box Dimensionen: 300mm*300mm*290mm

EUR-Palette (EPAL) 800mm * 1200mm: 8 Boxes pro Lage - max. 4 Lage: total 32 Boxes was entspricht eine gesamte Menge von 576 Liter.

Gesamthöhe: ca. 1360mm. Bruttogesamtgewicht: ca. 624 kg. Nettogesamtgewicht: 578 kg.

Zoll Code / Tarifnummer Advanced Water S-100: 2201.1000

Advanced Water Gel CC6: Nur für Bemusterung (1 Liter)
